

DESTINATION NORD

Measurement and reporting

Sustainable tourism development

Sustainable Development Goal 8: Decent work and economic growth

Tourism, as services trade, is one of the top four export earners globally, currently providing one in ten jobs worldwide. Decent work opportunities in tourism, particularly for youth and women, and policies that favor better diversification through tourism value chains can enhance tourism positive socio-economic impacts.

Sustainable Development Goal 13: Climate action

Tourism contributes to and is affected by climate change. Tourism stakeholders should play a leading role in the global response to climate change. By reducing its carbon footprint, in the transport and accommodation sector, tourism can benefit from low carbon growth and help tackle one of the most pressing challenges of our time. (source: <https://tourism4sdgs.org/>)

Sustainable Development Goal 11: Sustainable cities and communities

Tourism can advance urban infrastructure and accessibility, promote regeneration and preserve cultural and natural heritage, assets on which tourism depends. Investment in green infrastructure (more efficient transport, reduced air pollution) should result in smarter and greener cities for, not only residents but also tourists.

Sustainable Development Goal 12: Responsible consumption and production

The tourism sector needs to adopt sustainable consumption and production modes, accelerating the shift towards sustainability. Tools to monitor sustainable development impacts for tourism including for energy, water, waste, biodiversity and job creation will result in enhanced economic, social and environmental outcomes.

	SDG 8	SDG 11	SDG 12	SDG 13	SDG 17
Goal 1: 20-30 new partnerships between tourism operators in the destination. Initiative: Project: <i>Instant Green Tourism</i> Timespan: 2021 		●			●

Results

Goal 1: Through the project Instant Green Tourism partnerships between tourism operators, and across business areas, have been formed to support and accelerate sustainable development. These new collaborations have for example emerged more sustainable supply chains, new sustainable tourism experiences and sustainable branding of areas.

Goal 2: Participants in Instant Green Tourism have created 163 new product ideas, process ideas and collaboration ideas. At the project's completion in June, 72 of the 163 ideas/products/collaborations was realized and we will continue to develop and implement the remaining initiatives together with the tourism operators and partners.

Goal 3: In process

Goal 4: The following insights were found through an evaluation survey regarding the Instant Green Tourism program:

- 80% completely agree / agree that they have received good and useful inspiration.
- 68% completely agree / agree that they have received useful consulting on sustainability.
- 68% completely agree / agree that they have received useful ideas and experiences from other participants.
- 93% completely agree / agree that they have gained insight into other tourism companies' attitude and wishes in regards to sustainability and green transition.

Goal 5: In process

Goal 6: In process

Other sustainable initiatives 2021

TripDoodler

Destination Nord are about to start a collaboration with TripDoodler, which is a new unified travel planning platform, databased with sustainability at its core and transparent in the way sustainability is classified. Dedicated to empower all travelers around the world to create adventures based on more sustainable travel choices - whether our guests want to reduce their carbon footprint while traveling or support local businesses. It will also create the opportunity for the tourism operators in our destination to showcase sustainable products and services on the platform. Read more about TripDoodler here: <https://tripdoodler.com/>

Fair Festival

Aalborg has paused its Sustainability festival until 2024, which has made us search for alternative experiences that can provide sustainable information, inspiration and knowledge. Therefore, we have teamed up with Green Light, who hosts Fair Festival – a sustainable festival and sales fair. Currently, we are working on facilitating the opportunity for Fair Festival to host a sustainable event in our destination starting in 2022. Read more about Fair Festival here: <https://fairfestival.dk/>

Bicycling tourism angels

Destination Nord have introduced cycling information staff, who can be found in Aalborg, Hals, Sæby, Skagen and Frederikshavn in the high season. It is an addition to the "old-fashioned" tourist office, which is placed in Skagen. We call them "The bicycling tourism angels" who helps tourists and guests with good local knowledge and tourist information. The initiative is based on our digital focus, also described in Destination Nord's tourism strategy, hence the tourist angels will not be loaded with paper brochures, but armed with tablets so they can help tourists find various information, e.g. via our website: www.enjoynordjylland.dk
